Rémunération : a étudier
Secteur : Analyses, mesures et sondages

Formations

2008
lasalle beauvais institute (used called igal) bachelor's degree in geology in beauvais (france)
2007
igal institute of geology albert de lapparent in cergy pontoise paris (france)
2006
. classe préparatoire biologie 2nd class (advanced scientific foundation course for engineer school) in nantes (france) at lycée clémenceau
2005
classe préparatoire biologie 1st class (advanced scientific foundation course for engineer school) in nantes (france) at lycée clémenceau.
2004
june baccalauréat s (scientific) in tours (france) at lycée descartes.

Expériences professionnelles

2014 - 2015 — Marin calier
columbus gold corp. gold exploration work for the paul isnard montagne d'or project in french guiana as a geotechnician. 6 months drilling campain work based at camp citron in the rain forest. creating drilling pads and positionning rigs (dd drilling equipment) core logging (geotechnical structures oriented structures, jrc, irs...)
2011 - 2011 — Géologue minier / Géologue minière
saint barbara mining limited gwalia gold mine, leonora, goldfields, western australia. working as a core logger and underground contractor geologist. consisting in diamond core logging (dd holes) face mapping underground sampling (core sampling and underground face mapping) compiling datas reporting senior geologist.
2011 - 2013 — Consultant / Consultante géothermie
helioresources (bafex tanzania ltd) gold exploration work (hydrothermal gold within proterozoic formations) within the lupa goldfield, remote areas in south west tanzania as a project geologist. since january , country manager consisting in drilling (dd & rc) supervising as project geologist diamond cores & rc chips logging sampling supervising outcrops and formations mapping compiling datas, sections, profiles and maps on geosoft. hse &relationships with local populations logistic work for the drilling and mapping campains reporting directly director dealing with the license and prospection permit directly with madini (ministry of minerals and energy) dealing directly with contractors (drillers, suppliers…)
2010 - 2011 — Géothermicien / Géothermicienne
sdp (perforations et diagraphies society) oil & gas rigs, northern france working as a logging field engineer in the northern france oil, gaz and geothermal rigs (lundin, total, gdf), in partnership with such companies as schlumberger and halliburton. consisting in supervising and recording logs for cbl (cement boundery locator), ccl (casing collar locator) and cic. repairing the tools, recording and interpreting results (on alt log and wellcad programs). supervising contracts and relationships with foremen and drillers. witnessing drilling operations.
2009 - 2010 — Géomaticien / Géomaticienne
total e&p madagascar exploration geologist/sedimentologist in madagascar western remote areas for tar sands (bemolanga mining project) as an exploration geologist ð- dd drilling geological supervising in western

madagascar areas. ð- managing and supervising the local malagacy junior geologists' team. ð- identifying, localizing and mapping the outcrops in the field. ð- finding bitumous outcrops in order link the datas and create a map. as a sedimentologist ð- logging and describing cores (7km done personally in 1.5 year on a cm scale) ð- compiling description datas on wel cad software ð- correlating the faces descriptions, the logs and the bitumous content ð- selecting samples for bitumous estimation (aspec and deanstarck mostly) ð- compiling the photographic correlations on icar software. august march tanzaniteone mining ltd, south african gemstones mine in northern tanzania underground and exploration junior geologist, based in merelani and lemshuku areas, kilimandjaro, tanzania as an underground geologist • underground face mapping (maximum 600 meters deep) • mineralisations grading on graphitic gneiss. • ore body modelling (basics in surpac) as an exploration geologist (tsavorite exploration in lemshuko remote areas in the bush) • mapping outcrops in the bush • digging trenches identify the faces • managing the local masai helpers team • supervising soil sampling • supervising part of the camp logistic (ordering tools, water and food supplies...) april july mdn tanzania ltd gold exploration around tulawaka barrick gold mine, tanzania. as an exploration student geologist (final placement) • rc and dd drilling supervising in south west remote areas • logging cores and crushes • digging trenches • supervising topographic and sampling campaigns. ineris institute (national institute of risks and industrial environment). 3 months geophysics project as a student about st maximin freestone quarry (paris) consisting in • using radars and electric panels. • studying the rehabilitation of a former quarry.
