Excellence in cement consulting services through top project management and implementation

CESA Engineering was founded in Geneva, Switzerland.

The company serves local and international customers by providing engineering services for industrial & mining projects from feasibility studies to commissioning and start-up.

The company is based on experienced engineers and designers in process, mechanical, electrical & control, civil work engineering and geology each of them counting not less than 15 years of world-wide experience in his field.

Site Project Managers and Site Construction Managers H/F
to head Greenfield plant projects overseas

Your Responsibilities :

Your main responsibilities are :

Realization of a capital expenditure project which includes tasks such as overall project administration up to commissioning and performance tests.

Your Profil :

Your qualifications and experience :

- University degree in engineering, chemistry or physics
- Expert in management of large capital expenditure projects
- Broad experience in plant design and/or construction of cement manufacturing facilities
- Excellent negotiation skills in English or French and, at a minimum, fluency in a second language.

Russian or Spanish could be of advantage, depending on the specific project.

The job requires international relocation.

An understanding of other cultures, excellent communication skills as well as strategic and conceptual thinking are required.

We offer you an assignment in an international environment and favorable terms of employment.
